

# Flexible Instructional Day Plan

**Program:** Cybersecurity and Networking Technology

**Contact information:** Kurt Blanock, [kblanock@steelcentertech.com](mailto:kblanock@steelcentertech.com),

**Attendance:** Attendance will be taken as follows: participation in the live virtual meeting lesson in Google Meet, completion of the asymmetrical assignment in Canvas, or asymmetrical assignment in the Cisco Networking Academy. Assignments must be completed by 1:20 PM.

**Daily Grade:** You are expected to participate in the live virtual lesson in Google Meet. If you have a conflicting lesson with your home school, you may attend either Google Meet lesson. The daily grade will be based on your attendance and participation in the live Google Meet lesson, completion of any assignments posted in Canvas, completion of at least five unique page views in the Cisco Networking Academy and any Cisco Networking Academy exams if assigned.

**Virtual Meeting Lesson:** The live, virtual lessons in Google Meet will be at 8:10 AM and 12:10 PM. A link to the lessons will be posted in Canvas in the Flexible Instruction Day (FID) Module. The lesson contents will be whatever the lessons were scheduled for that day as posted in Canvas. The level 1 and level 2 lessons will each be approximately 20-30 minutes in duration.

**Virtual Office Hours:** At the conclusion of the live lessons, I will remain in Google Meet to go over exams, activate exams, or provide help on an individual basis until 10:10 AM and 2:10 PM. I will also check my email regularly during the school day and can schedule additional help as needed.

## Technology Concerns:

Are you able to access Canvas from home? Yes      No

Are you able to access the Cisco Networking Academy from home?      Yes      No
